Project Highlights:

Udex Interview Evaluation

Udex Interview Evaluation is a mobile IOS App and used to schedule interview in the organization. This app keep the record of candidate interview evaluation. There is super admin panel from where admin can see details of interview evaluation and generate report for each month. I prepared the execution plan and kept track of the project, created database schema, IOS API, push notification and code deployed.

Technologies Used: PHP5.6, Laravel 5.2, Nginx, MySQL, Aws Services, IOS App.

Inventory Management System

Inventory management is a web based saas application for tracking inventory levels, orders, sales and deliveries. It can also be used in the manufacturing industry to create a work order, bill of materials and other production-related documents. I developed the modules like report generation, Mass mailing, Promotion and Advertisement and used Aws services to store media files.

Technologies Used: PHP5.6, Laravel 5.0, Nginx, MySQL, Aws Services, Html, Css, Js, Ajax, Js PI Chart, Social API,Google Map,Paypal

Ecommerce Data Import Script

Ecommerce data import script is automated tools that developed to scrap ecommerce product information from the website. I developed the script to scrap product data from the ecommerce website of particular category and also responsible to save the record into database, validate record and reschedule it in particular span of time using artisan command and cronjob.

Technology User : PHP7.1,Laravel 5.3, CronJob, Third party Api, Mysql, Aws Services, Xpath, Mozenda

Yellotasker

YelloTasker is web platform like freelance and Upwork, Here user can post their task/job,search job and job seeker will bid on that task then job poster can assign the task doer. I was responsible for API development for front end angular based development, Created Database Schema, Developed role based cms, Developed Modules like, User Management, Task Management, Task Category, Blogs, Support Ticket, Molepay gateway Integration.

Technology Used : PHP7.1,Laravel 5.2, CronJob, Third party Api, Mysql, Aws Services, Xpath, Api and Molepay API

N3-Uptime Tools

N3 Uptime is a tool that regularly checks the health and availability of the servers. Adding domain layer concepts for enabling, disabling, and checking the status of a domain name in uptime. We have written cloud formation template and this template is responsible to create aws infra including EC2 Instance, Rds Instance,Lambda function, cloud watch alarm, SQS Queue,S3 bucket and DB backup. I have also used moonshot tools to deploy code.

Technology Used:

PHP7.2, Mysql, Aurora database,Nodejs,Cloud formation template, CQRS, DDD, AWS , EC2, SQS , RDS, S3, Lambda function, Route 53, Apache server git, ruby and Moonshot

Current Company: Motifworks India Pvt Ltd, Pune

Position	Sr. PHP Developer.
Tools & Technology	PHP/Laravel 5.x/ CodeIgniter/ HTML/CSS/Javascript/ JQuery / AJAX /Google Map API/Payment Gateway/Mozenda/Webservices/MolePlay/ NodeJs/Jquery/Aurora/REST DB/Moonshot/AWS(EC2,LAMBDA,RDS,SQS,Cloudformation)/CQRS/DDD/GIT
Duration	Since June 2017 to till date

Previous Company: Web Dunia Pvt Ltd,Indore

Position	Sr. PHP Developer.
Tools & Technology	PHP/Laravel 5.x/ CodeIgniter/ HTML/CSS/Javascript/ JQuery / AJAX /Google Map API/Payment Gateway/REST / Web services/Jquery/MySql/AWS/GIT/Docker/ORM/Doctrine
Duration	Since Sep 2016 to May 2017

Previous Company: CarolData Technology Pvt Ltd, Indore

Position	PHP Developer
Tools & Technology	PHP/CodeIgniter/MySql HTML/CSS/Javascript/ JQuery / AJAX /Google Map API/Payment gateway/ForSquare API/ Webservices/Laravel/ MySql/ORM/GIT
Duration	Since Jan 2013 to Sep 2016

Personal Profile:

Date of Birth : 25/Dec/1988
Father's Name : Mr. Upendra Roy
Mother's Name : Mrs. Manju Roy
Hobbies : Playing Chess and Solving Sudoku
Lingual Skills : English, Hindi.

Declaration:

I hereby declare that the above information is true and complete to the best of my knowledge.
